

9.19.09

Dear Dr. Steed,

Thank you for suggesting I have blood work done to confirm the potential problem you saw when reviewing my Optomap Scan.

I'm sure you have the results by now because I requested Dr. Miller's Lab Staff to forward it to you.

I was told normal range for Diabetes testing is 0.00 - 0.59%. My level is at 0.58% and I was told to alter my diet and have levels rechecked in three months.

The Optomap Scan wasn't offered to me until I came to your office last year.

Your level of Patient Care is amazing and I appreciate all you've done.

Sincerely,
Mary
